Information Release:

10-Years anniversary release, mind-bending psychedelic Goa-Trance album by Zirrex. 3xCD! "Lost In Time", special edition of an album on Compact Discks, which includes 3 parts. This is a reissue of an album originally released in 1998 on audiotape and in 2000 on 2xCD bonus part with tracks, written in 1998-2001 and not included in original release.

This music has stormed into the minds and changed mental perception of many psytrance addicts in 90-s. It still remains in favourites in lots of collections and minds of oldschool psy listeners. This album as well as all of the Zirrex music is, without doubt, the most global and significant happening on Russian psytrance scene in 90's.

Those days lots of people in clubs and on open air events danced, loved, smiled, grew up and became inspired with this music, it captivated and fascinated with its uniqueness and 100% recognizeability. And now, through many years, on the new uprising wave of oldschool psy sound of 90-s, this music is again in demand and twists the minds all over the planet. Having penetrated through space and time beyond many borders, this music has gained the true value in the hearts of psychedelic people all over the world - we were many times convinced in that with dozens of emails, comments and live talk with inhabitants of so many places on Earth. With this reissue of the album and with its new quality sound we thank them all for their flights in unexplored worlds and moments of mind expansion which they generously share with us. We thank them for warm hearts, kind words, love and inspiration.

"Lost In Time" - more 3 hours of global, driving, genuine psychedelic, melodic, powerful, beautiful, complex, intriguing and positive music. "Lost In Time" - harmless natural psychedelic in qualitative music form. This is psychedelic trance the way it emerged in 90-s and then transformed to other music styles.
